

## Key Responsibilities

### Complex problem solving and analytical capabilities

Business analysts will help extract insights from consumers, sales and other data available and provide data analysis, synthesis & presentation support. Previous experience on working with data to develop insights would be a plus.

### Ability to work well with teams

This role would require working closely with the onsite and offshore consultants on a variety of projects which would involve close co-ordination and collaboration.

### Effective communication skills

This role involves the ability to understand briefs from clients on complex business issues as well as presenting the results of the analysis in a precise and impactful manner.

### Self-motivated and driven

The role involves working under dynamic, high pressure conditions, sometimes turning around projects in a single day.

### Thorough and meticulous

This role involves working with large amounts of data which are used to take critical decisions by our clients. Therefore, attention to detail and error spotting skills to ensure 100% accuracy of outputs are important qualities that we seek.

## Qualifications

- B.Tech/B.E – All the branches at campus except Computer Science, Electronics and Information Technology.
- Students with active back log are not eligible to participate in the placement process with AQ.
- Work experience required for the role of business analyst is zero years.

## Salary and Other Details

The total compensation offered is Rs. 4,09,000/- per annum to Rs. 5,63,000/- per annum.

Note: The company management reserves the right to offer higher compensation to few students subject to their excellent performance in the AQ selection process. The company is not obligated to follow this for all selected students and the standard offer mentioned above will be applicable unless formally communicated otherwise by AQ's senior management/Human Resources department.
